Concept, creative direction and editorial: Michael S. Moniz. Writing, visual development and artwork created with ChatGPT in collaboration.

The Server Room
Edition 1.0 / November 1, 2026 / Digital reading edition.

Fictional AI-workplace satire for adult readers. Character bodies, dialogue and events are invented. Model names appear as satirical characters; these stories are not model evaluations or capability reports.

The quantum machine is a stylised superconducting-computer setting. Its voice and room-door preferences are invented. The sealed apparatus is inspired by the golden tiers of a dilution refrigerator.

IBM: cryogenic-system visual background

Artwork retained at its original 1024 x 1536 pixel dimensions. This PDF uses JPEG quality 95, without chroma subsampling or pixel resizing. Unmodified PNG originals accompany the source package.
